

Software Quality Assurance - Test Coordinator

The test coordinator will work as a sub-project manager for testing and quality assurance in customer projects. He or she will accompany a project from requirement and risk analysis to go live, coordinate, support and monitor progress for testing activities throughout a project and communicate closely with test managers and project managers. Test coordinators represent the quality assurance of projects and as such participate in requirement, testing and acceptance meetings with customers on-site.

Requirements

- ▶ Good communication and coordination skills
- ▶ Habit to work systematically, in a structured manner and thoroughly
- ▶ Ability to handle English and German language in written and spoken
- ▶ Availability for business travel (e.g. to Germany) as the test coordinator occasionally needs to participate in events at customer site
- ▶ Strong commitment to responsibilities and sense of ownership (after all we are looking for test coordinators who will be a major figure for a project)

Preferred Qualifications (optional)

- ▶ Experience in software testing
- ▶ ISTQB certification (e.g. Foundation or higher)
- ▶ Degree in Computer Science or Engineering
- ▶ Experience in test automation and good working knowledge of Java or web technologies (HTML, JavaScript , CSS)
- ▶ Understanding of relational databases and database queries
- ▶ Project management experience
- ▶ Experience in or knowledge of logistics or supply chain management

What we offer

- ▶ Ownership and responsibility for a project
- ▶ A quick start into a challenging and rewarding career path
- ▶ Chances to grow on the job as candidates who do not yet meet the required qualification can start out for half a year as testers while being trained into their future responsibilities
- ▶ Mentoring and strong support on the job to grow into the responsibilities
- ▶ Challenging tasks for versatile minds and the opportunity to grow in skills and responsibilities
- ▶ International team with flat hierarchy in a dynamic and friendly environment
- ▶ Prospect for personal development in a growing company and industry
- ▶ Competitive salary, annual performance review and bonus, cafeteria money

About our company

We are a software development company for supply chain solutions, headquartered in Munich / Germany. As innovative provider of BPM (Business Process Management) and LES (Logistics Execution Systems) solutions we are leading the market in the industrial yard management solutions. We deploy highly automated and state of the art software technology (i.e. smartphone apps, biometrics, RFID Auto-ID solutions, etc.), creating value for our blue chip customers such as Henkel, Bayer, BASF, Wacker and many more.

We strive for quality, progress and sustainability and are looking for like-minded people to join our team.

How to apply
