Preferred Qualifications (optional)

- ▶ Degree in Computer Science or a closely related field
- ▶ Knowledge in web based front end development using reactjs./redux, JavaScript
- ▶ Spring Framework (Core, Web MVC)
- ▶ JPA - Hibernate
- ▶ Mobile development / Apache Cordova

What we offer

- ▶ International team with flat hierarchy in a dynamic and friendly environment
- ▶ Competitive salary, prospect for personal development in a growing company and environment
- ▶ Working for blue chips customer with diverse technologies and challenging tasks for versatile minds
- ▶ Opportunities to be creative and have an impact on the way we are developing

About our company

We are a software development company for supply chain solutions, headquartered in Munich / Germany. As innovative provider of BPM (Business Process Management) and LES (Logistics Execution Systems) solutions we are leading the market in the industrial yard management solutions. We deploy highly automated and state of the art software technology (i.e. smartphone apps, biometrics, RFID Auto-ID solutions, etc.), creating value for our blue chip customers such as Henkel, Bayer, BASF, Wacker and many more.

We strive for quality, progress and sustainability and are looking for like-minded people to join our team. Become part of our success story!

Have we awakened your interest? If so please send your CV and documents to recruiting@star-trac.com
We are looking forward to hearing from you.
